

Workshop on 'Integrating Wildlife into Transformative Urban Nature Planning Actions'

How can human-wildlife interactions (HWI) be more effectively focused on and integrated into transformative urban nature planning actions? To respond to this critical question, the existing knowledge among scientists, wildlife managers, urban practitioners and citizens about wildlife animals in the city can vary greatly. This creates tension and uncertainty when attempting to link the benefits of urban nature planning for humans and other species simultaneously under diverse contexts. There is an urgent need to bring science and practice together by integrating all different forms of knowledge. Doing so would facilitate comparative assessment and evaluation of urban nature planning that effectively incorporates information about wildlife and their interactions with humans.

Focusing on this, we are organizing a workshop with the aim of identifying action points that help us to move beyond a human-centric perspective and explicitly consider aspects of human-wildlife interactions and more-than-human justice in urban decision-making processes in cities.

Building on the EU's [Urban Nature Plan \(UNP\) guideline](#), the workshop objectives are to:

- Identify factors that enable or hinder the integration of wildlife considerations into urban planning, policy frameworks, and implementation processes;
- explore effective measures and develop actionable recommendations for cities seeking to strengthen human–wildlife interactions and coexistence;
- facilitate the exchange of experiences and knowledge on integrating wildlife into urban nature planning strategies, with a particular focus on implementation practices and policy directions.

Date and time: October 1, 2026,
09:30-17:00

Location: SPARK
Kaiserstraße 24, 76133 Karlsruhe-Innenstadt-Ost
Karlsruhe Institute of Technology (KIT)
<https://maps.app.goo.gl/NaBByxhsSX6qvmjk6>

Workshop Agenda

Time plan	Activities
09:30-10:30	Visiting a local urban green site in Karlsruhe (optional to participants) Meeting point: Friedrichsplatz https://maps.app.goo.gl/9xZCD7z9YAiFjavn6
10:30-11:30	Get back to the main venue, registration and coffee break Location: SPARK https://maps.app.goo.gl/NaBByxhsSX6qvmjk6
11:30-12:30	Opening and introductory session  CitiesForALL project - Marufa Sultana, Marius Huber, Somidh Saha (Institute for Technology Assessment and Systems Analysis, KIT)  UNP+ (Urban Nature Plans plus, EU HORIZON project) - Kassia Rudd (ICLEI) and Hannah Bolz (Stadt Mannheim)  Citizen Science and Wildlife Monitoring - Julia Felber (SWILD – Stadtökologie, Wildtierforschung, Kommunikation, Zürich)
12:30-13:30	Session 1 – group works: Relevance of Human-Wildlife Interaction (HWI) within the UNP - Angela Lühtrath (DialogDesign)
13:30 - 14:15	Lunch break
14:15 - 15:45	Session 2 – group works: Challenges and policy suggestions to UNP - Angela Lühtrath
15:45 -16:00	Coffee break
16:00 -16:45	Plenary session: Sharing results from group works -Marufa Sultana, Angela Lühtrath
16:45 -17:00	Wrap-up
18:00	Dinner

Please confirm your participation through either of the following options:
